Don't want BigFix?

Reduce your carbon footprint through manual settings.

For Windows Vista and Windows 7:

Right-click on your desktop and click Personalize. Click Screen Saver and change your power settings to turn off your monitor after a short period of inactivity.

For Windows XP:

Right-click on your desktop. Go to the Screen Saver tab and click the power button to set up a power scheme that turns off your monitor after a short period of inactivity.

For Mac OS X:

Open the System Preferences and click Energy Saver in the Hardware section. Select a time that puts your display to sleep after a short period of inactivity.
